Company description

The Besteiro Ingeniería SL group is dedicated to the certification and safety of machinery. They offer services such as CE Marking, Adaptations to RD 1215, Risk Assessments and Technical Files. In addition to these audits, they also develop other works, such as quality audits (ISO: 9001, 14001, 45001, 5001), welding studies, rack certification, legalization of APQs, installations, machine designs and programming (automatons, robots, cobots, etc.). They offer turnkey projects.

Products and services

Auxiliary services

Automation and robotics Diverse Engineering Industrial supplies Machinery and small integrated lines Process outsourcing

Processes and technologies

Assembly Electrical material Glass processing Metal shaping Plastic shaping Textile shaping Wood processing

Main customers Cie Galfor, Foresa, Finsa, Treves Galicia, Lactalis, etc.

Certification of machines: CE marking, R.D 1215/1997, other European directives and standards. Safety check list for production lines and equipment. Design of safety components for machines and production lines in automotive companies and other industrial sectors.

Currently, Besteiro Ingeniería SL is in the design and study phase of an app for portable devices. Users of the application will be able to consult and perform calculations on the safety of their machines and production lines. With this, they get a first information, important for the customer and can reduce the time in the correction of certain risks.
