Sales information

Main value chain Tier 1

Company description

OP Mobility is a world leader in the manufacture of automotive exterior components and modules, supporting and accompanying the customers with 86 factories in 19 countries. OP Mobility develops solutions for a more sustainable and connected car.

The Redondela plant was inaugurated in 1991, since then it has produced parts for the Citroën ZX, AX, Xsara Picasso, Berlingo, C4 Picasso, Grand C4 Picasso and Peugeot Partner vehicles.

It currently produces the Citroën bumpers, models: C-Elysée, C4 Spacetourer, Grand C4 Spacetourer and Berlingo, Peugeot Rifter and 301 and Opel Combo, as well as the tailgate of the C4 Spacetourer and Grand C4 Spacetourer.

Products and services

Module or function	Injection of thermoplastic material, painted and assembled for the
Boot Exterior elements Front End Rear end	 production of bumpers and rear doors. OP Mobility offers innovative weight-reducing and aerodynamic solutions to reduce fuel consumption and CO2 emissions. The body parts are integrated into the design of the vehicles, developing an offer with high performance compounds: Rear doors with a weight reduction of 30%, compared to steel equipment. Bumpers that combine aesthetics, lightness and aerodynamic optimization.
	optimization.

Processes and technologies

Assembly	The Redondela factory has in its facilities injection machines with a
	closing force of 1,000 to 3,200 tons, robotized paint line, bite
Joining processes	assembly line, JIT parts served directly to the customer, specific
Plastic shaping	die-cutting and welding machines, gluing technology with robotic
Surface treatments and finishes	cells for the production of a plastic tailgate and packaging line for
	spare parts.

Main customers

Stellantis.
